## PROJECTS

### Ruby Command Line Chess [🔗](#)

- A fully functional and playable chess game.
- Follows all major chess rules including check, checkmate, stalemate, en passant, castling, etc..
- Players can challenge another person or a simple AI.
- Tested with RSpec.

### Gembook (in progress--styling) [🔗](#)

- A social media site written in Ruby on Rails: Includes all basic functionality of Facebook (Posting, commenting, liking, friending/unfriending).
- Search for other users by name.
- Utilizes polymorphic associations.
- Includes RSpec test suite (model and system specs).

### Private Events [🔗](#)

- A full-stack events application where users can, create or attend events, and invite other users to events.
- Sends emails to users in production.
- Includes live chat functionality on Member and Event pages via Action Cable.
- Tested with RSpec.

### Raven Reservations [🔗](#)

- A flight-booker programmed in Ruby on Rails.
- Showcases advanced form functionality utilizing nested attributes.
- Allows users to book a one-way flight to a selection of airports with up to four passengers.

## WORK EXPERIENCE

### Line Cook/Shift Lead Square Mfg Co.

01/2021 - Present

Detroit Style Pizza

[Achievements/Tasks](#)

- Employee of the Month May 2021 and August 2021.
- Prepare items to order with attention to detail.

Natick, MA

## OPEN SOURCE EXPERIENCE

### Contributor

#### The Odin Project [🔗](#)

01/2020 - Present

A free and open source web development curriculum

[Tasks/Achievements](#)

- Contributed my way to the top fifty contributors list of a popular Rails app used by thousands.
- Implemented soft deletion of project submissions using Discard gem and wrote specs using RSpec.
- Developed the ability for admins to track the resolver of a flagged project submission.
- Added several minor fixes to the curriculum (fixed typos, removed broken links, etc.).

## SKILLS
