PROJECTS

Ruby Command Line Chess

- Adheres to all major chess rules including check, checkmate, stalemate, en passant, castling, etc.
- Move pieces using traditional algebraic notation.
- Serialize objects using YAML for in-game saving/loading.
- Challenge another person or the AI.
- Includes RSpec test suite.
- Live: <https://replit.com/@JoeMcCannDev/chess>
- GitHub: <https://github.com/joe-mccann-dev/chess>

Gembook

- A social media site written in Ruby on Rails: Includes all basic functionality of Facebook (Posting, commenting, nested-comments, liking, friending/unfriending).
- Search for other users by name.
- Utilizes polymorphic associations.
- Includes RSpec test suite.
- Live: <https://gembook.net>
- GitHub: <https://github.com/joe-mccann-dev/gembook>

Private Events

- Full stack event planning application coded in Rails 6.
- Utilizes service objects to send multiple invitations and emails simultaneously.
- Live chat functionality via Action Cable/Websockets: Post a message in real-time on an event page or in the members' area.
- View which members are online with status indicators.
- Includes RSpec test suite.
- Live: <https://private-events.net>
- GitHub: <https://github.com/joe-mccann-dev/private-events>
